## Introduction:

Aspiring Cybersecurity professional with a passion for identifying vulnerabilities and securing digital infrastructures. Experienced in various cybersecurity tools and methodologies through free courses and hands-on projects.

## Certificates:

Completed multiple cybersecurity courses from reputed platforms such as Google Cybersecurity, Coursera, and edX. Certificates include topics on network security, ethical hacking, and risk management.

## Project Summaries:

1. Network Vulnerability Assessment: Conducted detailed scans and analyses to identify security loopholes in a corporate network.
2. Web Application Security Testing: Performed penetration testing on web applications to detect and exploit common vulnerabilities like SQL injection and XSS.
3. Incident Response Simulation: Developed and executed incident response plans to mitigate simulated cyberattacks, enhancing readiness and recovery strategies.
